- D10: EP-A-1 500 958 (MUSTACCIUOLI, LAURA) 26 January 2005

1. The application does not meet the requirements of Article 6 PCT, because claim 1 is not clear.

The subject-matter of claim 1 is defined as a lighting clip

Some features of claim 1 are then defined with respect to some external features:

- the lighting clip is "fixed around an edge of a panel" and
- "supplied by an electric power system".

It appears therefore that claim 1 does not only set forth features of a lighting clip, but instead defines the relationship of the clip to some other elements (panel, power system) which are external features and are themselves not within the scope of protection of the claims, thus rendering claim 1 unclear (Art. 6 PCT).

2. The present application does not meet the criteria of Article 33(1) PCT, because the subject-matter of independent claim 1 ~~is not~~ is new in the sense of Article 33(2) PCT.

The document D1 discloses all the features of claim 1 (the references in parentheses applying to this document):

- a lighting clip (clamping part 8) *for use* around an edge of a transparent or semi-

transparent panel in a removable or permanent way, and (*for being*) supplied by an electric power system,
- the clip being in the form of a section, with at least one side open, built of clamping arms (legs 9, 10) joined with a connector and equipped with at least one source of light placed in the internal space.

Moreover, each of the documents D2 to D9 also discloses all the features of claim 1.

3. Dependent claims 2 to 4 do not contain any features which, in combination with the features of any claim to which they refer, meet the requirements of the PCT in respect of novelty, see documents D1 to D9 and the corresponding passages cited in the search report.
